# Smoke Alarms
## RENTERS RESPONSIBILITES

It is the renter's obligation to ensure the smoke alarms are checked and not tampered with. If you notice they are not working, you need to report it straight away to your CERC Maintenance Director.

## When do I need to do this?
The fire authority recommends smoke alarms are tested monthly.

## What do I need to do?
Check the smoke alarm is working by pressing the test button until the alarm sounds.

**Smoke alarms beep loudly when there is a fire.**

**If the alarm does not activate during testing then you must notify your Maintenance Director within 24 hours.**
